

## Accepted Manuscript

Title: Identification of Fe and Zr oxide phases in an iron-zirconium binary oxide and arsenate complexes adsorbed onto their surfaces

Authors: Xiaomin Dou, Gui-Chang Wang, Mengqiang Zhu, Fudong Liu, Wei Li, Mohan Dinesh, Charles U. Pittman Jr.

PII: S0304-3894(18)30228-0  
DOI: <https://doi.org/10.1016/j.jhazmat.2018.04.004>  
Reference: HAZMAT 19287

To appear in: *Journal of Hazardous Materials*

Received date: 22-11-2017  
Revised date: 1-4-2018  
Accepted date: 2-4-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Identification of Fe and Zr oxide phases in an iron-zirconium binary oxide and arsenate complexes adsorbed onto their surfaces

## Highlights:

- >The components, active sites and synergistic effect of Fe-Zr oxide were investigated.
