Title: Application of carbon dots as efficient catalyst for the green oxidation of phenol: kinetic study of the degradation and optimization using response surface methodology

Authors: Meghdad Pirsaeheb, Sajad Moradi, Mohsen Shahlaei, Negin Farhadian

PII: S0304-3894(18)30270-X
DOI: <https://doi.org/10.1016/j.jhazmat.2018.04.038>
Reference: HAZMAT 19321

To appear in: *Journal of Hazardous Materials*

Received date: 21-12-2017
Revised date: 9-4-2018
Accepted date: 16-4-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Application of carbon dots as efficient catalyst for the green oxidation of phenol: kinetic study of the degradation and optimization using response surface methodology

'Declarations of interest: none'

Highlights

- Bio-polymer based Carbon dots can activate hydrogen peroxide to produce hydroxyl radicals
- Carbon dots show desirable catalytic activity for degrading phenol
