Title: BS12-assisted flotation for the intensification of SNPs separation from CMP wastewater using a novel flotation column

Authors: Nan Hu, Ting Shu, Zhaoliang Wu, Guimin Liu, Zhiqiang Li, Yanli Zhao, Hao Yin, Di Huang

PII: S0304-3894(17)30850-6
DOI: <https://doi.org/10.1016/j.jhazmat.2017.11.028>
Reference: HAZMAT 18999

To appear in: *Journal of Hazardous Materials*

Received date: 12-7-2017
Revised date: 15-11-2017
Accepted date: 16-11-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

BS12-assisted flotation for the intensification of SNPs separation from CMP wastewater using a novel flotation column

Highlights

- Interaction mechanisms between SNPs and BS12 were investigated.
- Micro-bubbles could strengthen the interfacial adsorption.
- RHF had the ability to enhance the foam drainage.
- SNPs were recovered and enriched simultaneously from CMP wastewater.
