Title: Evaluation for the thermokinetics of the autocatalytic reaction of cumene hydroperoxide mixed with phenol through isothermal approaches and simulations

Authors: Chen-Rui Cao, Shang-Hao Liu, Mitali Das, Chi-Min Shu

PII: S0957-5820(18)30201-5
DOI: <https://doi.org/10.1016/j.psep.2018.05.025>
Reference: PSEP 1396

To appear in: *Process Safety and Environment Protection*

Received date: 15-2-2018
Revised date: 18-5-2018
Accepted date: 21-5-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Evaluation for the thermokinetics of the autocatalytic reaction of cumene hydroperoxide mixed with phenol through isothermal approaches and simulations

HIGHLIGHTS

- Kinetics model of CHP decomposition was created based on isothermal data.
- Kinetics approach and appropriate heat balance for scale up simulation.
- Safety parameters from results can provide information for loss prevention.
- Kinetics parameters determined through model-fitting method.
- Simulation method for SADT determination was confirmed.
