

## Accepted Manuscript

Title: Hydrocyclone breakage of activated sludge to exploit internal carbon sources and simultaneously enhance microbial activity

Authors: Yinxiang Xu, Hualin Wang, Zhenhua Wang, Yuanyuan Fang, Yi Liu, Tao Zeng, Zhongbin Liu, Ming Liu

PII: S0957-5820(18)30230-1  
DOI: <https://doi.org/10.1016/j.psep.2018.06.002>  
Reference: PSEP 1404

To appear in: *Process Safety and Environment Protection*

Received date: 11-11-2017  
Revised date: 6-5-2018  
Accepted date: 2-6-2018

Please cite this article as: Xu, Yinxiang, Wang, Hualin, Wang, Zhenhua, Fang, Yuanyuan, Liu, Yi, Zeng, Tao, Liu, Zhongbin, Liu, Ming, Hydrocyclone breakage of activated sludge to exploit internal carbon sources and simultaneously enhance microbial activity. *Process Safety and Environment Protection* <https://doi.org/10.1016/j.psep.2018.06.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Hydrocyclone breakage of activated sludge to exploit internal carbon sources and simultaneously enhance microbial activity
