This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Biodiesel is one of the promising alternative energy resources.
- Biodiesel production generates highly polluted wastewater.
- Biodiesel wastewater treatments developed so far have their own novelty and weaknesses.
- Coagulation-BAF processes seem feasible for biodiesel wastewater treatment.
