Interfacial tensiometry and dilational surface visco-elasticity of biological liquids in medicine

V.B. Fainerman, D.V. Trukhin, Igor I. Zinkovych, R. Miller

PII: S0001-8686(17)30007-6
DOI: doi:[10.1016/j.cis.2017.08.002](https://doi.org/10.1016/j.cis.2017.08.002)
Reference: CIS 1820

To appear in: *Advances in Colloid and Interface Science*

Received date: 10 January 2017
Revised date: 31 July 2017
Accepted date: 7 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Interfacial tensiometry and dilational surface visco-elasticity of biological liquids in medicine

V.B. Fainerman¹, D.V. Trukhin², Igor I. Zinkovych³ and R. Miller⁴

Contents

1. Introduction
2. Experimental methods
3. Surface characteristics of biological liquids for healthy persons
4. Influence of diseases on surface characteristics of biologic liquids
 - 4.1. *Oncology*
 - 4.2. *Oral liquid, effect of carious lesion of teeth*
 - 4.3. *Neurosyphilis*
 - 4.4. *Congenital pneumonia of premature newborns*
 - 4.5. *Chronic recurrent pancreatitis*
 - 4.6. *Acute renal failure*
 - 4.7. *Women with infertility*
 - 4.8. *Arthritis, chronic bronchitis and chronic obstructive pulmonary disease*
 - 4.9. *Other diseases*
 - 4.10. *Influence of fluorocarbon gases on lung phospholipid monolayers*
5. Conclusions
6. Acknowledgement
7. References
