### Accepted Manuscript

Nano-carrier based drug delivery systems for sustained antimicrobial agent release from orthopaedic cementous material

Yazan Al Thaher, Stefano Perni, Polina Prokopovich

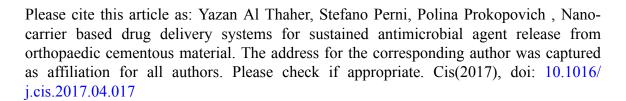

PII: S0001-8686(16)30372-4

DOI: doi: 10.1016/j.cis.2017.04.017

Reference: CIS 1751

To appear in: Advances in Colloid and Interface Science

Received date: 16 December 2016 Revised date: 25 April 2017 Accepted date: 26 April 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## ACCEPTED MANUSCRIPT

# Nano-carrier based drug delivery systems for sustained antimicrobial agent release from orthopaedic cementous material

cementous material
