Title: Stabilization mechanism of CO₂ foam reinforced by regenerated cellulose

Authors: Xia Yin, Wanli Kang, Shuyang Song, Zitong Huang, Xiaoyu Hou, Hongbin Yang

PII: S0927-7757(18)30651-4
DOI: <https://doi.org/10.1016/j.colsurfa.2018.07.042>
Reference: COLSUA 22697

To appear in: *Colloids and Surfaces A: Physicochem. Eng. Aspects*

Received date: 18-6-2018
Revised date: 21-7-2018
Accepted date: 23-7-2018

Please cite this article as: Yin X, Kang W, Song S, Huang Z, Hou X, Yang H, Stabilization mechanism of CO₂ foam reinforced by regenerated cellulose, *Colloids and Surfaces A: Physicochemical and Engineering Aspects* (2018), <https://doi.org/10.1016/j.colsurfa.2018.07.042>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Stabilization mechanism of CO₂ foam reinforced by regenerated cellulose
