Title: Design of Polymer Particles Maintaining Dispersion Stability for the Synthesis of Hollow Silica Particles through Sol-Gel Reaction on Polymer Surfaces

Authors: Tetsuya Yamamoto, Yuya Takahashi

PII: S0927-7757(18)30398-4  
DOI: <https://doi.org/10.1016/j.colsurfa.2018.05.036>  
Reference: COLSUA 22504

To appear in: *Colloids and Surfaces A: Physicochem. Eng. Aspects*

Received date: 5-4-2018  
Revised date: 10-5-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
