Title: An environmentally benign methodology to elaborating polymer nanocomposites with tunable properties using core-shell nanoparticles and cellulose nanocrystals

Authors: Fatima Hassouna, Johana Korbelařová, Baptiste Jaquet, Edit Mawunya Kutorglo, Duřan Kopecký, Pavel Ulbrich, Michal Fulem, Zdeněk Hrdlička, Miroslav řoóř

PII: S0927-7757(18)30422-9
DOI: <https://doi.org/10.1016/j.colsurfa.2018.05.054>
Reference: COLSUA 22522

To appear in: *Colloids and Surfaces A: Physicochem. Eng. Aspects*

Received date: 5-12-2017
Revised date: 11-5-2018
Accepted date: 18-5-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

An environmentally benign methodology to elaborating polymer nanocomposites with tunable properties using core-shell nanoparticles and cellulose nanocrystals
