Title: Linalool Bioactive Properties and Potential Applicability in Drug Delivery Systems

Authors: Irina Pereira, Patrícia Severino, Ana C. Santos, Amélia M. Silva, Eliana B. Souto

PII: S0927-7765(18)30525-3
DOI: <https://doi.org/10.1016/j.colsurfb.2018.08.001>
Reference: COLSUB 9533

To appear in: *Colloids and Surfaces B: Biointerfaces*

Received date: 24-4-2018
Revised date: 27-7-2018
Accepted date: 2-8-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Linalool Bioactive Properties and Potential Applicability in Drug Delivery Systems

Graphical Abstract

Highlights

- Linalool is present in the *Lamiaceae*, *Lauraceae* and *Apiaceae* plant families.
- Linalool has several bioactive properties tested, mostly, in *in vitro* models.
- Cyclodextrins and lipid nanoparticles were recently used to encapsulate linalool.
