

## Accepted Manuscript

Title: Electrically polarized PLLA nanofibers as neural tissue engineering scaffolds with improved neuritogenesis

Authors: Nathalie Barroca, Ana Marote, Sandra I. Vieira, Abílio Almeida, Maria H.V. Fernandes, Paula M. Vilarinho, Odete A.B. da Cruz e Silva

PII: S0927-7765(18)30202-9  
DOI: <https://doi.org/10.1016/j.colsurfb.2018.03.050>  
Reference: COLSUB 9251

To appear in: *Colloids and Surfaces B: Biointerfaces*

Received date: 7-11-2017  
Revised date: 22-3-2018  
Accepted date: 29-3-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Electrically polarized PLLA nanofibers as neural tissue engineering scaffolds with improved neuritogenesis

Nathalie Barroca<sup>1†</sup>, Ana Marote<sup>2†</sup>, Sandra I. Vieira<sup>2\*</sup>, Abílio Almeida<sup>3</sup>, Maria H.V. Fernandes<sup>1</sup>, Paula M. Vilarinho<sup>1</sup> and Odete A. B. da Cruz e Silva<sup>2</sup>

2. Institute of Biomedicine (iBiMED) and Centre for Cell Biology (CBC), Department of Medical Sciences, Universidade de Aveiro, 3810-193 Aveiro, Portugal

3. Department of Physics, Faculdade de Ciências, Universidade do Porto, 4169-007, Porto, Portugal

\* E-mail: sivieira@ua.pt

† Both authors contributed equally to this work

### Graphical abstract

### Highlights

- The ability of PLLA to develop a controllable polarization was investigated for neural tissue engineering
