

Accepted Manuscript

Title: Fish sarcoplasmic proteins as a high value marine material for wound dressing applications

Authors: Sara Vieira, Albina R. Franco, Emanuel M. Fernandes, Sara Amorim, Helena Ferreira, Ricardo A. Pires, Rui L. Reis, Albino Martins, Nuno M. Neves

PII: S0927-7765(18)30206-6
DOI: <https://doi.org/10.1016/j.colsurfb.2018.04.002>
Reference: COLSUB 9255

To appear in: *Colloids and Surfaces B: Biointerfaces*

Received date: 30-11-2017
Revised date: 1-3-2018
Accepted date: 1-4-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Fish sarcoplasmic proteins as a high value marine material for wound dressing applications

Graphical abstract

Characterization of extracts and membranes derived from Fish Sarcoplasmic Proteins (FSP).

Highlights

- Superior mechanical strength as compared with other natural-based materials;
- Material recovered from the waste water of cod processing with benefits for the environment;
- Different isolated batches, from different individuals, present consistent protein compositions;
