

Accepted Manuscript

Title: Nano hydroxyapatite-blasted titanium surface creates a biointerface able to govern Src-dependent osteoblast metabolism as prerequisite to ECM remodeling

Authors: Célio J.C. Fernandes, Fábio Bezerra, Marcel R. Ferreira, Amanda F.C. Andrade, Thais Silva Pinto, Willian F. Zambuzzi

PII: S0927-7765(17)30889-5
DOI: <https://doi.org/10.1016/j.colsurfb.2017.12.049>
Reference: COLSUB 9072

To appear in: *Colloids and Surfaces B: Biointerfaces*

Received date: 21-9-2017
Revised date: 21-12-2017
Accepted date: 27-12-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Short statistical summary

- Total number of words: 4738 (including references and figure captions)
- Tables: 01
- Figures: 05

Nano hydroxyapatite-blasted titanium surface creates a biointerface able to govern Src-dependent osteoblast metabolism as prerequisite to ECM remodeling
