Title: Piezoelectric Polymers as Biomaterials for Tissue Engineering Applications

Author: Clarisse Ribeiro Vítor Sencadas Daniela M. Correia Senentxu Lanceros-Méndez

PII: S0927-7765(15)30160-0
DOI: <http://dx.doi.org/doi:10.1016/j.colsurfb.2015.08.043>
Reference: COLSUB 7330

To appear in: *Colloids and Surfaces B: Biointerfaces*

Received date: 25-4-2015
Revised date: 21-7-2015
Accepted date: 25-8-2015

Please cite this article as: Clarisse Ribeiro, Vítor Sencadas, Daniela M. Correia, Senentxu Lanceros-Méndez, Piezoelectric Polymers as Biomaterials for Tissue Engineering Applications, *Colloids and Surfaces B: Biointerfaces* <http://dx.doi.org/10.1016/j.colsurfb.2015.08.043>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Piezoelectric Polymers as Biomaterials for Tissue Engineering Applications

Clarisse Ribeiro^{1*}, Vítor Sencadas^{1,2}, Daniela. M. Correia,^{1,3} and Senentxu. Lanceros-Méndez^{1*}

Graphical abstract

Highlights

- Novel tissue engineering strategies can take advantage of active materials
- Electrical and electromechanical cues are the most relevant ones for tissue engineering
- Piezoelectric polymers can provide electrical and mechanical cues to growing tissue
- Review on piezoelectric materials used for tissue engineering applications is provided
- The main achievements, challenges and future needs are discussed
