Physical and chemical stability of L-ascorbic acid microencapsulated into taro starch spherical aggregates by spray drying

J.D. Hoyos-Leyva, A. Chavez-Salazar, F. Castellanos-Galeano, L.A. Bello-Perez, J. Alvarez-Ramirez

PII: S0268-005X(18)30318-7

DOI: [10.1016/j.foodhyd.2018.05.002](https://doi.org/10.1016/j.foodhyd.2018.05.002)

Reference: FOOHYD 4420

To appear in: *Food Hydrocolloids*

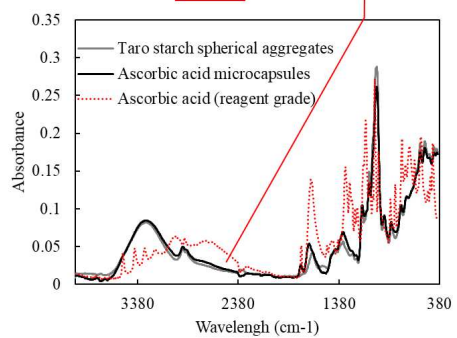

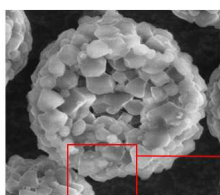

Received Date: 20 February 2018

Revised Date: 5 April 2018

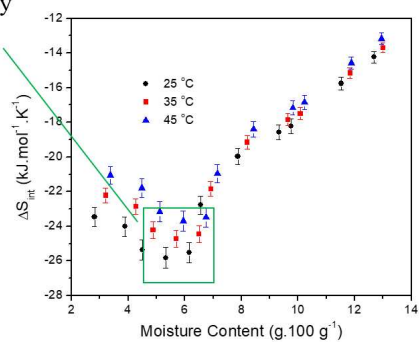

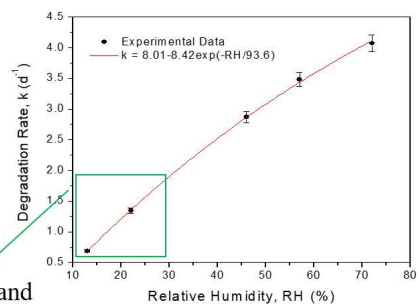

Accepted Date: 2 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

L-ascorbic acid microencapsulated
in taro starch spherical aggregates

Maximum physical and
chemical stability
conditions
