Cold and salt stress modulate amount, molecular and macromolecular structure of a *Lactobacillus sakei* dextran

Roman M. Prechtel, Daniel Wefers, Frank Jakob, Rudi F. Vogel

PII: S0268-005X(18)30232-7

DOI: [10.1016/j.foodhyd.2018.04.003](https://doi.org/10.1016/j.foodhyd.2018.04.003)

Reference: FOOHYD 4370

To appear in: *Food Hydrocolloids*

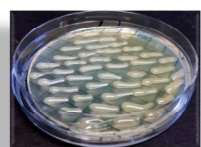

Received Date: 7 February 2018

Revised Date: 29 March 2018

Accepted Date: 1 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

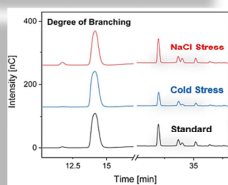

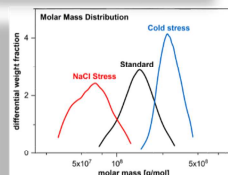

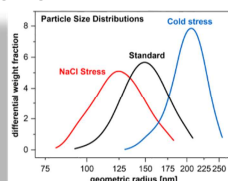

dextran producing  
starter culture

cold stress

dextran production

NaCl stress

### different structural properties of dextrans

possible application  
in fermented meat  
products
