Relationships between amylopectin molecular structures and functional properties of different-sized fractions of normal and high-amylose maize starches

Lingshang Lin, Canhui Cai, Robert G. Gilbert, Enpeng Li, Juan Wang, Cunxu Wei

PII: S0268-005X(15)30029-1

DOI: [10.1016/j.foodhyd.2015.07.019](https://doi.org/10.1016/j.foodhyd.2015.07.019)

Reference: FOOHYD 3075

To appear in: *Food Hydrocolloids*

Received Date: 4 March 2015

Revised Date: 9 June 2015

Accepted Date: 17 July 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Relationships between amylopectin molecular structures and functional properties of different-sized fractions of normal and high-amylose maize starches
