Understanding the energy level matching relationships between semiconductor photocatalysts and organic pollutants for effective photocatalytic degradations

Haixia Tong, Xiaojun Zhan, Xiong Tian, Junhua Li, Dong Qian, Daoxin Wu

PII: S0021-9797(18)30524-1
DOI: <https://doi.org/10.1016/j.jcis.2018.05.009>
Reference: YJCIS 23586

To appear in: *Journal of Colloid and Interface Science*

Received Date: 22 January 2018
Revised Date: 28 April 2018
Accepted Date: 5 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Understanding the energy level matching relationships between semiconductor photocatalysts and organic pollutants for effective photocatalytic degradations
