

## Accepted Manuscript

The role of water in reducing WO<sub>3</sub> film by hydrogen: controlling the concentration of oxygen vacancies and improving the photoelectrochemical performance

Yang Liu, Yahui Yang, Qiong Liu, Yaomin Li, Jie Lin, Wenzhang Li, Jie Li

PII: S0021-9797(17)31201-8  
DOI: <https://doi.org/10.1016/j.jcis.2017.10.039>  
Reference: YJCIS 22909

To appear in: *Journal of Colloid and Interface Science*

Received Date: 28 August 2017  
Revised Date: 9 October 2017  
Accepted Date: 11 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The role of water in reducing WO<sub>3</sub> film by hydrogen: controlling the concentration of oxygen vacancies and improving the photoelectrochemical performance
