

## Accepted Manuscript

Title: Continuous Protein Crystallisation Platform and  
Process: Case of Lysozyme

Authors: Huaiyu Yang, Peter Peczulis, Pavan Inguva, Xiaoyu  
Li, Jerry Y.Y. Heng

PII: S0263-8762(18)30270-3  
DOI: <https://doi.org/10.1016/j.cherd.2018.05.031>  
Reference: CHERD 3195

To appear in:

Received date: 5-2-2018  
Revised date: 20-5-2018  
Accepted date: 21-5-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Continuous Protein Crystallisation Platform and Process: Case of Lysozyme

Graphical abstract

- Development of the new generation of continuous crystallisation platform
- Successfully demonstrated the crystallisation of proteins with the oscillatory flow crystalliser
- The equilibrium state (with consistent crystal size and solution concentration) of continuous crystallisation achieved
- With same oscillatory condition, the crystallisation processes in continuous / batch oscillatory flow crystallizer were in consistence.
