Title: Enhancing the separation performance of vanadium from a black shale leaching solution by supported liquid membrane using trialkylamine

Authors: Hong Liu, Yi-min Zhang, Jing Huang, Tao Liu, Nan-nan Xue, Da-shuang Luo

PII: S0263-8762(18)30280-6
DOI: <https://doi.org/10.1016/j.cherd.2018.05.039>
Reference: CHERD 3203

To appear in:

Received date: 7-12-2017
Revised date: 19-4-2018
Accepted date: 29-5-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Enhancing the separation performance of vanadium from a black shale leaching solution by supported liquid membrane using trialkylamine
