Title: Synergism between Ionic Liquid and Ultrasound for Greener Extraction of Geraniol: Optimization using Different Statistical Tools, Comparison and Prediction

Authors: Miral R. Thakker, Jigisha K. Parikh, Meghal A. Desai

PII: S0263-8762(18)30177-1
DOI: <https://doi.org/10.1016/j.cherd.2018.04.003>
Reference: CHERD 3120

To appear in:

Received date: 17-11-2017
Revised date: 30-1-2018
Accepted date: 2-4-2018

Please cite this article as: Thakker, Miral R., Parikh, Jigisha K., Desai, Meghal A., Synergism between Ionic Liquid and Ultrasound for Greener Extraction of Geraniol: Optimization using Different Statistical Tools, Comparison and Prediction. *Chemical Engineering Research and Design* <https://doi.org/10.1016/j.cherd.2018.04.003>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Synergism between Ionic Liquid and Ultrasound for Greener Extraction of Geraniol:
Optimization using Different Statistical Tools, Comparison and Prediction**

Miral R. Thakker^{1,2}, Jigisha K. Parikh² and Meghal A. Desai^{2*}
