Title: Computational Fluid Dynamics simulation of the ALD of alumina from TMA and H₂O in a commercial reactor

Authors: G.P. Gakis, H. Vergnes, E. Scheid, C. Vahlas, B. Causat, A.G. Boudouvis

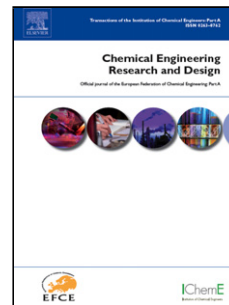

PII: S0263-8762(18)30096-0
DOI: <https://doi.org/10.1016/j.cherd.2018.02.031>
Reference: CHERD 3060

To appear in:

Received date: 6-11-2017
Revised date: 14-2-2018
Accepted date: 20-2-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Computational Fluid Dynamics simulation of the ALD of alumina from TMA and H₂O in a commercial reactor
