

## Accepted Manuscript

Title: The characteristics of resin/carbon composite electrode and application in selective adsorption of vanadium(IV) by capacitive deionization

Author: Jihua Duan Shenxu Bao Yimin Zhang

PII: S0263-8762(18)30023-6

DOI: <https://doi.org/doi:10.1016/j.cherd.2018.01.021>

Reference: CHERD 2995

To appear in:

Received date: 13-5-2017

Revised date: 22-10-2017

Accepted date: 9-1-2018

Please cite this article as: Duan, J., Bao, S., Zhang, Y., The characteristics of resin/carbon composite electrode and application in selective adsorption of vanadium(IV) by capacitive deionization, *Chemical Engineering Research and Design* (2018), <https://doi.org/10.1016/j.cherd.2018.01.021>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **The characteristics of resin/carbon composite electrode and**  
2 **application in selective adsorption of vanadium(IV) by capacitive**  
3 **deionization**
