Title: Optimisation of mixing performance of helical ribbon mixers for high throughput applications using computational fluid dynamics

Authors: O. Mihailova, T. Mothersdale, T. Rodgers, Z. Ren, S. Watson, V. Lister, A. Kowalski

PII: S0263-8762(18)30063-7
DOI: <https://doi.org/10.1016/j.cherd.2018.01.053>
Reference: ChERD 3027

To appear in:

Received date: 31-10-2017
Revised date: 25-1-2018
Accepted date: 30-1-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 Optimisation of mixing performance of
2 helical ribbon mixers for high throughput
3 applications using computational fluid
4 dynamics

12 **Highlights**

- 13 • 98 Helical mixer designs were screened using STAR-CCM+ and HEEDS package
14 • Experimental validation was performed using ERT and torque measurements
15 • Statistical analysis revealed key design features affecting mixer performance

16 **Keywords**

17 CFD, Optimisation, Mixing, Helical ribbon mixers, Rapid prototyping
