Title: Optimal design of process configuration for a cascade coproduction system to produce furnace off-gas-based clean fuels and chemicals

Author: Xiaohui Chen Danxing Zheng Xinxin Yi Zhao Ma

PII: S0263-8762(16)30039-9
DOI: <http://dx.doi.org/doi:10.1016/j.cherd.2016.03.034>
Reference: CHERD 2246

To appear in:

Received date: 19-7-2015
Revised date: 18-3-2016
Accepted date: 31-3-2016

Please cite this article as: Chen, X., Zheng, D., Yi, X., Ma, Z., Optimal design of process configuration for a cascade coproduction system to produce furnace off-gas-based clean fuels and chemicals, *Chemical Engineering Research and Design* (2016), <http://dx.doi.org/10.1016/j.cherd.2016.03.034>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- Proposed concept of chemical cascade coproduction system
- Built criteria evaluation method of material conversion and energy consumption
- Selected an optimal process configuration to use furnace off-gas
