Title: EFFECT OF IMPELLER TYPE AND DENSITY DIFFERENCE ON THE DRAW DOWN OF LOW DENSITY MICROSPHERES

Author: S. Vannia Perumal S. Jayanti K. Nagarajan

PII: S0263-8762(15)00371-8
DOI: <http://dx.doi.org/doi:10.1016/j.cherd.2015.09.019>
Reference: CHERD 2030

To appear in:

Received date: 1-6-2015
Revised date: 15-9-2015
Accepted date: 24-9-2015

Please cite this article as: Perumal, S.V., Jayanti, S., Nagarajan, K., EFFECT OF IMPELLER TYPE AND DENSITY DIFFERENCE ON THE DRAW DOWN OF LOW DENSITY MICROSPHERES, *Chemical Engineering Research and Design* (2015), <http://dx.doi.org/10.1016/j.cherd.2015.09.019>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Experimental study of draw down using three impellers
- Draw down of low density microspheres
- Large relative density variation obtained using different liquids
- Non-dimensional correlation for critical impeller speed
