

## Accepted Manuscript

Title: Numerical Investigation and Dimensional Analysis of Reaction Runaway Evaluation for Thermal Polymerization

Author: Yejun Zhu Yuanwu Chen Lei Zhang Weiqiang Li  
Baoling Huang Jingshen Wu

PII: S0263-8762(15)00273-7  
DOI: <http://dx.doi.org/doi:10.1016/j.cherd.2015.07.017>  
Reference: CHERD 1967

To appear in:

Received date: 4-3-2015  
Revised date: 16-7-2015  
Accepted date: 18-7-2015

Please cite this article as: Zhu, Y., Chen, Y., Zhang, L., Li, W., Huang, B., Wu, J., Numerical Investigation and Dimensional Analysis of Reaction Runaway Evaluation for Thermal Polymerization, *Chemical Engineering Research and Design* (2015), <http://dx.doi.org/10.1016/j.cherd.2015.07.017>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- Continuous dropping polymerization was modeled to evaluate reaction runaway risk.
- Lab scale fabrication of cross-linked polystyrene proves the model accuracy.
- Thick reaction layer is related with high explosive reaction risk.
- A non-dimensional safe criteria was proposed for large scale safe production.
