Title: A modified process for overcoming the drawbacks of conventional steam methane reforming for hydrogen production: Thermodynamic investigation

Author: Lin Zhu Luling Li Junming Fan

PII: S0263-8762(15)00396-2
DOI: <http://dx.doi.org/doi:10.1016/j.cherd.2015.10.022>
Reference: CHERD 2055

To appear in:

Received date: 14-6-2015
Revised date: 26-8-2015
Accepted date: 14-10-2015

Please cite this article as: Zhu, L., Li, L., Fan, J., A modified process for overcoming the drawbacks of conventional steam methane reforming for hydrogen production: thermodynamic investigation, *Chemical Engineering Research and Design* (2015), <http://dx.doi.org/10.1016/j.cherd.2015.10.022>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

■ Highlights

1. A novel SE-SMR thermally coupled with CLC process was presented.
2. This novel process was simulated and analyzed by Aspen Plus.
3. The competitiveness of this process showed more advantages.
