

Author's Accepted Manuscript

Architectural engineering of bioelectrochemical systems from the perspective of polymeric membrane separators: A comprehensive update on recent progress and future prospects

Péter Bakonyi, László Koók, Gopalakrishnan Kumar, Gábor Tóth, Tamás Rózsenberszki, Dinh Duc Nguyen, Soon Woong Chang, Guangyin Zhen, Katalin Bélafi-Bakó, Nándor Nemestóthy

PII: S0376-7388(18)31056-1
DOI: <https://doi.org/10.1016/j.memsci.2018.07.051>
Reference: MEMSCI16330

To appear in: *Journal of Membrane Science*

Received date: 17 April 2018
Revised date: 18 July 2018
Accepted date: 19 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
