Water Transport Mechanisms for Salt-Rejecting Membranes Driven by Soil-Water Potentials

Coleman J. Henry, Jonathan A. Brant, Thijs J. Kelleners

www.elsevier.com/locate/memsci

PII: S0376-7388(18)30846-9  
DOI: <https://doi.org/10.1016/j.memsci.2018.05.041>  
Reference: MEMSCI16181

To appear in: *Journal of Membrane Science*

Received date: 28 March 2018  
Revised date: 17 May 2018  
Accepted date: 20 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
