

## Author's Accepted Manuscript

Effects of organic fouling and cleaning on the retention of pharmaceutically active compounds by ceramic nanofiltration membranes

Yang-ying Zhao, Xiao-mao Wang, Hong-wei Yang, Yue-feng F. Xie

PII: S0376-7388(18)30979-7  
DOI: <https://doi.org/10.1016/j.memsci.2018.06.047>  
Reference: MEMSCI16264

To appear in: *Journal of Membrane Science*

Received date: 10 April 2018  
Revised date: 16 June 2018  
Accepted date: 24 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Effects of organic fouling and cleaning on the retention of pharmaceutically active compounds by ceramic nanofiltration membranes
