

Author's Accepted Manuscript

The role of MOFs in Thin-Film Nanocomposite (TFN) membranes

Cédric Van Goethem, Rhea Verbeke, Martin Pfanmöller, Tönjes Koschine, Marcel Dickmann, Tanja Timpel-Lindner, Werner Egger, Sara Bals, Ivo F.J. Vankelecom

PII: S0376-7388(18)30623-9
DOI: <https://doi.org/10.1016/j.memsci.2018.06.040>
Reference: MEMSCI16257

To appear in: *Journal of Membrane Science*

Received date: 7 March 2018
Revised date: 6 June 2018
Accepted date: 20 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
