

Author's Accepted Manuscript

Selective swelling of block copolymer ultrafiltration membranes for enhanced water permeability and fouling resistance

Dinglei Zhong, Zhaogen Wang, Qianqian Lan, Yong Wang

PII: S0376-7388(18)30381-8
DOI: <https://doi.org/10.1016/j.memsci.2018.04.021>
Reference: MEMSCI16105

To appear in: *Journal of Membrane Science*

Received date: 8 February 2018
Revised date: 12 April 2018
Accepted date: 15 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Selective swelling of block copolymer ultrafiltration membranes for
enhanced water permeability and fouling resistance
