

Author's Accepted Manuscript

Vapor-gap membranes for highly selective osmotically driven desalination

Jongho Lee, Anthony P. Straub, Menachem Elimelech

PII: S0376-7388(18)30169-8
DOI: <https://doi.org/10.1016/j.memsci.2018.03.059>
Reference: MEMSCI16053

To appear in: *Journal of Membrane Science*

Received date: 19 January 2018
Revised date: 19 March 2018
Accepted date: 21 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Vapor-gap membranes for highly selective osmotically driven desalination
