Energy analysis and optimization of hollow fiber membrane contactors for recovery of dissolve methane from anaerobic membrane bioreactor effluent

Wichitpan Rongwong, Kunli Goh, Tae-Hyun Bae

PII: S0376-7388(17)32702-3
DOI: <https://doi.org/10.1016/j.memsci.2018.03.002>
Reference: MEMSCI15996

To appear in: *Journal of Membrane Science*

Received date: 19 September 2017
Revised date: 26 February 2018
Accepted date: 1 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Energy analysis and optimization of hollow fiber membrane contactors for recovery of
dissolve methane from anaerobic membrane bioreactor effluent**
