

Author's Accepted Manuscript

Highly conductive anion exchange membranes with long flexible multication spacer

Ling Li, Chen Xiao Lin, Xiu Qin Wang, Qian Yang, Qiu Gen Zhang, Ai Mei Zhu, Qing Lin Liu

PII: S0376-7388(17)33299-4
DOI: <https://doi.org/10.1016/j.memsci.2018.02.048>
Reference: MEMSCI15973

To appear in: *Journal of Membrane Science*

Received date: 18 November 2017
Revised date: 4 February 2018
Accepted date: 20 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highly conductive anion exchange membranes with long flexible multication spacer

Ling Li, Chen Xiao Lin, Xiu Qin Wang, Qian Yang, Qiu Gen Zhang, Ai Mei Zhu, Qing Lin Liu*
