

Author's Accepted Manuscript

The roles of pH and draw solute on forward osmosis process treating aqueous naphthenic acids

Shu Zhu, Mingyu Li, Mohamed Gamal El-Din

PII: S0376-7388(17)30417-9
DOI: <https://doi.org/10.1016/j.memsci.2017.12.029>
Reference: MEMSCI15800

To appear in: *Journal of Membrane Science*

Received date: 9 February 2017
Revised date: 2 November 2017
Accepted date: 11 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The roles of pH and draw solute on forward osmosis process treating aqueous naphthenic acids
