

Author's Accepted Manuscript

Preparation and pervaporation performance of vinyl-functionalized silica membranes

Sadao Araki, Ami Okabe, Akira Ogawa, Daisuke Gondo, Satoshi Imasaka, Yasuhisa Hasegawa, Koichi Sato, Kang Li, Hideki Yamamoto

PII: S0376-7388(17)31471-0
DOI: <https://doi.org/10.1016/j.memsci.2017.10.066>
Reference: MEMSCI15693

To appear in: *Journal of Membrane Science*

Received date: 29 May 2017
Revised date: 28 October 2017
Accepted date: 31 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Preparation and pervaporation performance of vinyl-functionalized silica membranes
