

## Author's Accepted Manuscript

Sterile filtration of oncolytic viruses: an analysis of effects of membrane morphology on fouling and product recovery

Shabnam Shoaebargh, Ian Gough, Maria Fe Medina, Adam Smith, Joris van der Heijden, Brian Lichty, John Bell, David R. Latulippe

PII: S0376-7388(17)32587-5  
DOI: <https://doi.org/10.1016/j.memsci.2017.11.022>  
Reference: MEMSCI15718

To appear in: *Journal of Membrane Science*

Received date: 9 September 2017  
Revised date: 6 November 2017  
Accepted date: 6 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Sterile filtration of oncolytic viruses: an analysis of effects of  
membrane morphology on fouling and product recovery
