

Author's Accepted Manuscript

Transport properties of SulfonatedPoly(ether ether ketone) Membranes with Counter-Ion Substitution

Maritza Pérez-Pérez, David Suleiman

PII: S0376-7388(15)00541-4
DOI: <http://dx.doi.org/10.1016/j.memsci.2015.06.017>
Reference: MEMSCI13775

To appear in: *Journal of Membrane Science*

Received date: 2 January 2015
Revised date: 3 June 2015
Accepted date: 5 June 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Transport Properties of Sulfonated Poly(ether ether ketone) Membranes with Counter-Ion Substitution
