A Sacrificial-layer Approach to Fabricate Polysulfone Support for Forward Osmosis Thin-film Composite Membranes with Reduced Internal Concentration Polarisation

Peipei Xiao, Long D. Nghiem, Yong Yin, Xue-Mei Li, Mengxi Zhang, Gang Chen, Jianfeng Song, Tao He

PII: S0376-7388(15)00053-8
DOI: <http://dx.doi.org/10.1016/j.memsci.2015.01.036>
Reference: MEMSCI13438

To appear in: *Journal of Membrane Science*

Received date: 19 August 2014
Revised date: 8 January 2015
Accepted date: 17 January 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A Sacrificial-layer Approach to Fabricate Polysulfone Support for Forward Osmosis Thin-film Composite Membranes with Reduced Internal Concentration Polarisation
