Experimental investigation on the CO₂ separation performance from humid flue gas by TSA process

Yugo Osaka, Takuya Tsujiguchi, Akio Kodama

PII: S1383-5866(17)31008-0
DOI: <https://doi.org/10.1016/j.seppur.2018.06.008>
Reference: SEPPUR 14662

To appear in: *Separation and Purification Technology*

Received Date: 31 March 2017
Revised Date: 29 May 2018
Accepted Date: 2 June 2018

Please cite this article as: Y. Osaka, T. Tsujiguchi, A. Kodama, Experimental investigation on the CO₂ separation performance from humid flue gas by TSA process, *Separation and Purification Technology* (2018), doi: <https://doi.org/10.1016/j.seppur.2018.06.008>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Experimental investigation on the CO₂ separation performance from humid flue gas by TSA process
