Synthesis of novel CuO/LaFeO₃ nanocomposite photocatalysts with superior Fenton-like and visible light photocatalytic activities for degradation of aqueous organic contaminants

Yousef Soltanabadi, Milad Jourshabani, Zahra Shariatinia

PII: S1383-5866(17)33281-1
DOI: <https://doi.org/10.1016/j.seppur.2018.03.019>
Reference: SEPPUR 14439

To appear in: *Separation and Purification Technology*

Received Date: 8 October 2017
Revised Date: 1 December 2017
Accepted Date: 12 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Synthesis of novel CuO/LaFeO₃ nanocomposite photocatalysts with superior
Fenton-like and visible light photocatalytic activities for degradation of
aqueous organic contaminants**
