

## Accepted Manuscript

A novel reduced graphene oxide-based composite membrane prepared via a facile deposition method for multifunctional applications: oil/water separation and cationic dyes removal

Yixin Peng, Zongxue Yu, Fei Li, Qi Chen, Di Yin, Xia Min

PII: S1383-5866(17)34039-X  
DOI: <https://doi.org/10.1016/j.seppur.2018.01.059>  
Reference: SEPPUR 14353

To appear in: *Separation and Purification Technology*

Received Date: 10 December 2017  
Revised Date: 25 January 2018  
Accepted Date: 25 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A novel reduced graphene oxide-based composite membrane prepared via a facile deposition method for multifunctional applications: oil/water separation and cationic dyes removal
