A mussel inspired highly stable graphene oxide membrane for efficient oil-in-water emulsions separation

Zhanchao Liu, Weifu Wu, Yan Liu, Changchun Qin, Minjia Meng, Yinhua Jiang, Jian Qiu, Jianbo Peng

PII: S1383-5866(17)31593-9
DOI: <https://doi.org/10.1016/j.seppur.2018.01.041>
Reference: SEPPUR 14335

To appear in: *Separation and Purification Technology*

Received Date: 19 May 2017
Revised Date: 5 January 2018
Accepted Date: 18 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A mussel inspired highly stable graphene oxide membrane for efficient oil-in-water emulsions separation
