

## Accepted Manuscript

The effect of carboxyl multiwalled carbon nanotubes content on the structure and performance of polysulfone membranes for oil sands process-affected water treatment

Chelsea Benally, Mingyu Li, Mohamed Gamal El-Din

PII: S1383-5866(17)31948-2  
DOI: <https://doi.org/10.1016/j.seppur.2018.01.030>  
Reference: SEPPUR 14324

To appear in: *Separation and Purification Technology*

Received Date: 18 June 2017  
Revised Date: 12 December 2017  
Accepted Date: 15 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**The effect of carboxyl multiwalled carbon nanotubes content on the  
structure and performance of polysulfone membranes for oil sands  
process-affected water treatment**
