Microwave-induced catalytic application of magnetically separable strontium ferrite in the degradation of organic dyes: Insight into the catalytic mechanism

Xueyan Liu, Tingting Zhang, Lei Zhang

PII: S1383-5866(17)31083-3
DOI: <https://doi.org/10.1016/j.seppur.2017.12.015>
Reference: SEPPUR 14248

To appear in: *Separation and Purification Technology*

Received Date: 5 April 2017
Revised Date: 4 December 2017
Accepted Date: 5 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Microwave-induced catalytic application of magnetically separable
strontium ferrite in the degradation of organic dyes: Insight into the
catalytic mechanism
